BRIEF SUMMARY

Aspiring Full Stack Developer and Data Science Student with a strong passion for building end-to-end web applications and uncovering data-driven insights. Actively learning modern JavaScript technologies such as MongoDB, Express.js, React, and Node.js, while also developing skills in Machine Learning, Deep Learning, and statistical modeling using Python and SQL. Enthusiastic about creating scalable, user-focused, and impactful software solutions.

INTERNSHIPS

Jabsz Gaming Studios LLP. | IT / Computers - Software — 11 Apr, 2025 - 11 Jul, 2025

Web Developer

Key Skills: Firebase, React Native expo

Working on a cross-platform mobile application using React Native with Expo, providing a real-time synced counter experience. Worked on Firebase Authentication for secure user login and registration. Implemented Firestore/Realtime Database to store and persist user-specific counter values and Developed the paint Splitter and Dragan Features

PROJECTS

Air BnB (Wanderlust) — 01 Sep, 2025 - 01 Oct, 2025

Mentor: Ruchi Jain | **Team Size:** 1

Key Skills: HTML , CSS ,Bootstrap , Java Script ,Node.js, Express.js, MongoDB

Project Link: https://github.com/sahushyam50380/Airbnb-project

- Built an Airbnb Clone for users to create, edit, and delete listings securely.
- Implemented user authentication and role-based access control.
- Developed a full-stack Airbnb-inspired platform enabling users to list, search, book, and review rental properties. Following the MVC Architecture design

Crop Recommendation System — 01 Aug, 2025 - 01 Sep, 2025

Mentor: Ruchi Jain | **Team Size:** 2

Key Skills: Django, Django REST Framework, Machine learning

Project Link: https://github.com/sahushyam50380/Crop-Recommendation-System

- Developed a web-based Crop recommendation system using Django to assist farmers in selecting the most suitable crops based on environmental and soil conditions.
- Designed and implemented a machine learning model to analyze input data and provide accurate crop recommendations, enhancing agricultural productivity.

Crop Disease Prediction — 01 Apr, 2025 - 01 May, 2025

Mentor: Ruchi Jain | **Team Size:** 3

Key Skills: HTML , CSS , Java Script ,React.js, Django, Deep Learning

Project Link: https://github.com/sahushyam50380/PantifyAI

• Built a Django web application to provide a user-friendly interface for accessing crop disease prediction.
• Developed a web-based Crop Disease Prediction System using Django to assist farmers in early identification of crop diseases through image analysis.
• Leveraged a pre-trained Resnet50 deep learning model for feature extraction and classification of crop leaf images
Utilized real-life crop leaf images collected from actual agricultural environments to improve model reliability and practical accuracy.

Hospital Management Systerm

Mentor: Ruchi Jain | **Team Size:** 3

Key Skills: React.js , Python ,Django, Java Script

Project Link: https://github.com/amansahu47388/Hospital-Management-System

* Designed responsive and user-friendly UI for Admin, Doctor, Staff, and Patient dashboards.
* mplemented appointment scheduling, patient records, billing, and IPD/OPD modules with smooth navigation.
* Designed responsive layouts ensuring smooth performance across mobile, tablet, and desktop.
* Created reusable and scalable components to reduce code duplication.
* Optimized frontend performance by minimizing re-renders and improving component structure.
